Industrial Ergonomics and Injury Prevention Course

1 day course

Slips, Trips and Falls are the primary causes of disabling injuries resulting in lost work days, productivity and revenue. OSALP Injury Prevention Plan is a comprehensive program designed to increase your awareness of injury risks in the work environment and provide you with tools and techniques that can assist in preventing such an injury.

The Course

The course covers some of the following topics below:

- ◆ Human Body Mechanics and how it operates
- ◆ Injury Prevention Techniques
- ◆ Practical Demonstration and practice of the techniques in the class room
- ◆ Hand protection Module
- ◆ Back Protection Module
- ◆ Feet Protection Module
- ◆ Head Protection Module
- ◆ Eyes Protection Module
- ◆ Factory/Workshop employees
- ◆ Workshop Practical with equipment

What will you Learn?

Participants will become master by learning about:

- ◆ Prevention of injuries by understanding how the body operates and how injuries occur
- ◆ Reduction in the frequency and severity of injuries resulting from using tools, pushing, pulling, lifting, handling, climbing stairs and repetitive work
- ◆ Prevention of back, shoulder and arm injury
- ◆ Increased awareness of hazards and activities that can lead to risk in our daily work environment
- ◆ To work safer, smarter and with less strain by eliminating risk at home, work and leisure
- ◆ To be able to protect themselves and others by intervening positively to stop unsafe situations

It's a must do course.

Ranging from school children to every adult.

I hope I had done
this course 10 years earlier

Mr Ronald Reny Course Participant Cairo
