

# Safety Management and Best Practices

## OSALP 2009 Open Enrolment Course

The global trend in integrating Health, Safety and Environmental Management Systems within all other business management has changed the way safety is managed by all industries. Instead of prescriptive legislation and standards, a proactive approach to risk management based on structured and systematic risk assessment is now a common place.

**OSALP International** professional training courses combine the latest tools, techniques, market research, case studies and dynamic ways of thinking, delivered by experienced trainers to ensure the skills and knowledge acquired are directly applicable to your organization.

- ◆ **Research** Latest concepts, tools, techniques, tried and tested methods
