

HARM: Hazard Analysis and Risk Management Course

Business, social and natural phenomena evolve rapidly and in unforeseen ways today. Things change all the time and risk management requires new concepts and ideas to cope with the uncertainty that comes with the evolving world. Now, more than ever before, it is essential to understand the challenges posed by the new facets that risks can assume.

YOUR IMMEDIATE TAKE AWAY

- ▶ The development of high quality safety training programs
- ▶ Seeking and acting upon employees' views
- ▶ Empowering them to become actively involved with safety on a daily basis.

WHO SHOULD ATTEND

Safety managers, risk managers, supervisors and other operating managers who have management system responsibilities

OVERVIEW

Gain valuable knowledge in the theory and practice of OHS risk management in the areas of occupational health and hygiene, safety and ergonomics in design.

Also analyze how creating a culture that promotes safety can benefit organizations; resulting in lower accident rates, reduced turnover and absenteeism, and higher productivity.

SCHEDULING

25th-26th Jan, 22
Islamabad

2 days

PKR 29,700/person

PRICE INCLUSIVE OF:
Lunch, Refreshments, e-notes

COURSE CONTENTS

- Assess the degree of match between people and their activities, equipment, environment and systems. Design, implement and enhance ergonomic interventions.
- Identify potential health hazards in features of the workplace or working environment.
- Analyze the risks of worker exposure to potentially harmful agents and factors.
- Design, monitor and evaluate risk control strategies. Advise on the OHS requirements of the design process.
- Develop a systematic hazard identification and OHS risk evaluation system for safe design.
- Advise on principles of OHS risk control.

HOW WILL YOU BENEFIT

The participants will be introduced to a model where a traditional risk management process is augmented with information and knowledge management processes to improve model quality and useful-ness respectively.

Project OHS Risk Management is also included where the attention is on the strategic planning phase of a project when decision maker have to pick a roadmap among several alternatives
